

M314

WHEELED EXCAVATOR

Engine Power (ISO 14396:2002)	100 kW (134 hp)
Operating Weight Maximum	18 000 kg (39,680 lb)

Cat® C3.6 engine meets U.S. EPA Tier 4 Final, EU Stage V, and Korea Tier 4 Final emission standards.

THE NEW CAT® M314

BOOSTING EFFICIENCY

The Cat® M314 Wheeled Excavator enhances your productivity with more comfort in the cab and easy-to-use controls. Lower fuel and maintenance costs put money back in your pocket.

NEXT GENERATION WHEELED EXCAVATORS

The new wheeled excavators match your performance needs to bring you

- + LOWER OPERATING AND MAINTENANCE COSTS
- + INCREASED OPERATOR EFFICIENCY AND VISIBILITY
- + MORE IN-CAB COMFORT

DO MORE WORK WITH EXTENDED INTERVALS

M314F M314

MAXIMIZE PERFORMANCE

Work faster with up to 15% more swing torque with lower fuel and diesel exhaust fluid (DEF) consumption. Tiltrotator integration gives you more versatility to complete more tasks with one machine.

ENHANCED CAB COMFORT

Operate comfortably with the ergonomic control layout and cab options. Get better visibility with rear and side-view cameras and 360° machine view.

UP TO 10% MAINTENANCE PARTS SAVINGS¹

Fewer maintenance costs, combined with 100% daily ground level maintenance and shareable work tools, increase uptime and keep costs down.

¹ Compared to M314F.

CAT EQUIPMENT MANAGEMENT TECHNOLOGY

TAKES THE GUESSWORK OUT OF MANAGING YOUR EQUIPMENT

Cat equipment management telematics technology helps take the complexity out of managing your jobsites – by gathering data generated by your equipment, materials, and people and serving it up to you in customizable formats.

PRODUCT LINK™

Product Link™ collects data automatically and accurately from your assets – any type and any brand. Information such as location, hours, fuel usage, productivity, idle time, maintenance alerts, diagnostic codes, and machine health can be viewed online through web and mobile applications.

VISIONLINK®

Access information anytime, anywhere with VisionLink® – and use it to make informed decisions that boost productivity, lower costs, simplify maintenance, and improve safety and security on your jobsite. With different subscription level options, your Cat dealer can help you configure exactly what you need to connect your fleet and manage your business without paying for extras you don't want. Subscriptions are available with cellular or satellite reporting (or both).

Remote Services is a suite of technologies that improve your jobsite efficiency.

Remote Troubleshoot allows your Cat dealer to perform diagnostic testing on your connected machine remotely, pinpointing potential issues while the machine is in operation. Remote Troubleshoot ensures the technician arrives with the correct parts and tools the first time, eliminating additional trips to save you time and money.

Remote Flash updates onboard software without a technician being present, potentially reducing update time by as much as 50%. You can initiate the update when convenient, increasing your overall operating efficiency.

The **Cat app** helps you manage your assets – at any time – right from your smartphone. You can see your fleet location, hours, and other information you need to see. You will get critical alerts for required maintenance, and you can even request service from your local Cat dealer.

BOOST YOUR PRODUCTIVITY BY UP TO 45%

WITH SIMPLE-TO-USE INTEGRATED CAT® TECHNOLOGY

TECHNOLOGIES INCLUDE:

CAT GRADE WITH 2D

Cat Grade with 2D helps operators reach grade faster. Onboard processors and sensors provide real-time guidance on distance to grade without guesswork. Work safer with fewer ground personnel needed to check the work area for obstacles or grade.

CAT PAYLOAD

Cat Payload helps you achieve precise load targets to improve your operating efficiency. Pick up a load of material – with a bucket and thumb combination or grapple and clamshell attachments – and get a real-time weight estimate without swinging.

Cat technology gives you the edge. Operators of all experience levels will dig, load, and grade with more confidence, speed, and accuracy to save time and money.

CAT TECHNOLOGY MORE WORK, LESS TIME

GET JOBS DONE FASTER WITH LESS REWORK

Cat Grade with Advanced 2D* lets you create and edit grade designs with ease on a second high-resolution 254 mm (10 in.) touchscreen monitor. Cat Grade with 3D* adds real-time, pinpoint positioning using GPS and GLONASS.

*All Cat Grade systems are compatible with radios and base stations from Trimble.
Already invested in a grade infrastructure? You can install grade systems from Trimble onto the machine.

Get in and out of the cab more easily with the tilt-up left console. Deluxe and premium cab options offer supreme comfort from a heated/cooled seat to automatic temperature control.

CAB TAKES THE HARD OUT OF WORK

ERGONOMIC CONTROL LAYOUT

Controls are positioned to reduce fatigue and straining movements to help keep you operating at your full potential.

REDUCED CAB VIBRATIONS

Feel more comfortable in the cab while you work with reduced cab vibrations from advanced viscous mounts.

BLUETOOTH® CONNECTION

Bluetooth® integrated radio allows for seamless mobile phone connection to listen to music, podcasts and hands-free calling.

LONGER SERVICE INTERVALS

The in-cab monitor tracks filter life and machine intervals, so you always know when it's time for regular machine service.

GROUND LEVEL ACCESS

Complete your daily machine checks entirely from the ground, minimizing the need to access the upper platform.

NEW FILTERS

Two levels of filtration protect your engine from dirty diesel. The new hydraulic oil filter improves filtration performance and lasts up to 50% longer than previous filter designs.

SAVE UP TO

10% IN MAINTENANCE PARTS

KEYLESS PUSH START

Start the engine with the push-to-start button or the unique operator ID function.

MACHINE SETTINGS

Access the operator manual at your fingertips, as well as the power mode selector to keep productivity while using less fuel.

JOYSTICK PREFERENCES

Program in your preferred power mode and joystick preferences with your operator ID. Once you enter in your operator ID, the excavator remembers your settings each time. Make operating easier with the touch of a joystick button. Additional auxiliary relays allow you to power on or turn off a CB radio, beacon light, and even a dust suppression watering system without taking your hands off the joysticks.

TOUCHSCREEN MONITOR

Use the standard 254 mm (10 in) touchscreen monitor to adjust your heating/cooling setting for more comfort or to view your machine information.

SMARTBOOM™

Add SmartBoom™ to reduce stress and vibration to make finishing work easy and fast. SmartBoom allows more focus on stick and bucket, while the boom moves freely up and down without using pump flow.

TRAVEL SMARTER

Easily work with the swing and auto travel lock or the automatic brake and axle lock to reduce the number of tasks you need to do. Set your cruise control when traveling distance from site to site.

RIDE CONTROL

The ride control system lets you travel faster over rough terrain with improved ride quality. Accumulators act as shock absorbers to help make your journey smoother.

JOYSTICK STEERING

Keep both hands on the joysticks while simultaneously moving the boom and stick and repositioning the machine with the slider switch on the right joystick.

WORK MORE EFFICIENTLY
WITH MORE CONFIDENCE

EXPAND YOUR JOBSITE CAPABILITIES

WITH MORE SWING TORQUE AND FUEL EFFICIENCY

A 15% increase in swing torque versus the previous model makes traveling, swinging, and working on slopes easy. Backfill trenches and move around your jobsite faster than before – allowing you to be more productive and finish jobs quickly. An advanced hydraulic system provides the optimum balance of power and efficiency while giving you the control you need for precise digging requirements.

LOOK OUT FOR YOUR PEOPLE AND YOUR EQUIPMENT

SAFETY FEATURES

STAY SAFE EVERY DAY

FACT:

#1 cause of construction accidents: **FALLS***

49% OF FALLS RESULT IN SERIOUS INJURY

30% OF FALLS RESULT IN DEATH

100% GROUND-LEVEL MAINTENANCE HELPS PREVENT FALLS

FALLS

Daily maintenance checks can be performed with 100% of the points accessible from ground level, making maintenance faster, easier, and safer. Standard LED lights give you a better view of your jobsite.

- + Enjoy better visibility into trenches, in each swing direction, and behind you. The smaller cab pillars, larger windows, and a flat engine hood design lower obstruction to your view. Rearview and side-view cameras are standard, and the 360° view system option offers a higher viewing vantage point of the machine.
- + The standard sound suppression rollover protective structure (ROPS) cab meets ISO 12117-2:2008 requirements and helps to block the noise to stay focused on the job.
- + The service platform design provides easy, safe, and quick access to upper platform. The steps use anti-skid punch plate to prevent slipping.
- + The auto axle lock presses the pedal for you to reduce your overall number of actions. The machine automatically detects when the service brake and axle need to be locked or unlocked. It releases automatically when you press the travel pedal.

INCREASE PRODUCTIVITY AND VERSATILITY WITH CAT ATTACHMENTS

You can easily expand the performance of your machine by utilizing any of the variety of Cat attachments. Each Cat attachment is designed to fit the weight and horsepower of Cat wheeled excavators for improved performance, safety, and stability. Lower your costs by sharing the same attachments as the 313 Cat excavator.
